

Plant Assessor

PURPOSE

Select Plant Australia provides a Regional Plant Assessor service to implement the process below and provide governance on all subcontractors and third-party plant in order to comply with Laing O'Rourke's Primary Standards. Our experienced personnel undertake the inspections along with providing support and guidance to projects, suppliers and subcontractors on how to manage their plant and equipment annual inspections.

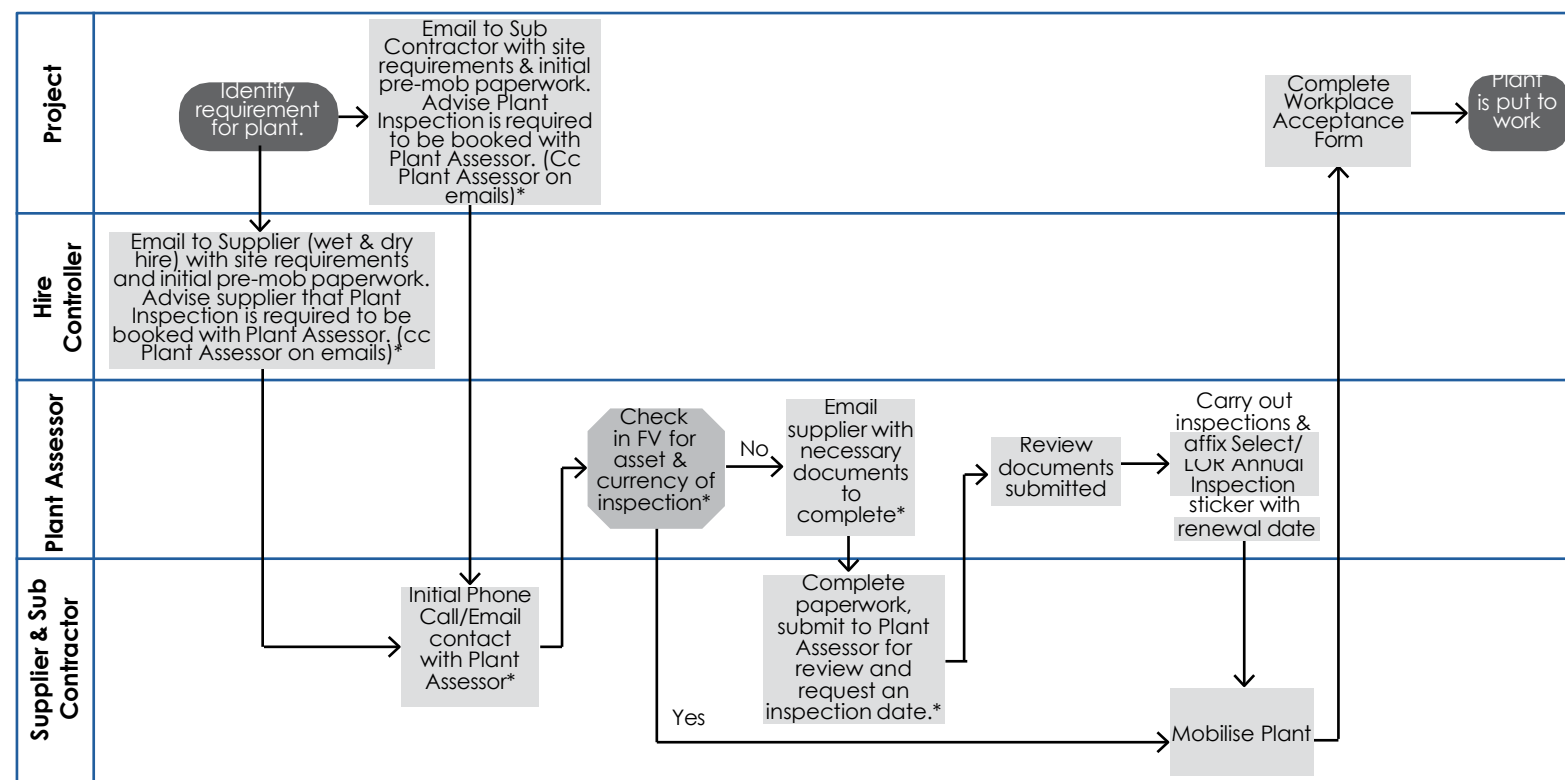

SCOPE

In line with the Primary Standard 'Plant and Equipment', this process should be completed by a Regional Plant Assessor (SME). This is for any plant and equipment that requires detailed compliance inspections.

APPLICATION

The below process flow represents one plant inspection only - the same process should be repeated for each asset as required. Expiry dates in Field View should be set to 12 months from the date of the initial inspection. All subcontractors and third-party plant owners are to manage the expiry dates as noted on the Select Annual Inspection Sticker affixed to their assets.

Plant Assessor Process

* 3-5 Days before work is scheduled to commence
